This month we are bringing the spotlight to someone from Golf Course Maintenance.

Maciel Trejo is just a typical guy outside of Bay Oaks Country Club. He is married with two kids and lives in Dickinson Texas. Maciel started at Bay Oaks 18 years ago on the GCM crew. He worked his way up from weed eater to equipment operator.

Maciel is one of the most important crew members on the Agronomy staff and was promoted to head mechanic in 2019. He is a very detail-oriented mechanic, and it shows in his work. He strives to have the best course conditions possible for the Membership and welcomes not only the good comments but the bad ones as well.

Maciel has no problem getting out on the course with a weed eater or mower when the crew is behind. He always says they are a team, and it takes a team to do their job. Without Maciel, the superintendent’s job would be very difficult and stressful. He is a team leader, and the crew looks up to him.

If you happen to see Maciel around the course, make sure and say hello and thank him for his hard work.

**Golf Course Maintenance**
This is mosquito spray and sunscreen season. Please apply spray on sunscreen and bug spray over concrete. When sprayed on grass a chemical in the spray discolors the grass leaving spots on the golf course. It is easy to see where the person was standing as the footprints are clearly green and the grass is brown around them.

We have aerification coming up on June 7-9 and we will have a contractor out to inject sand into the greens we sodded last year and the Clubhouse putting green. This process is called Dryject. This will help the greens and open channels for roots and water to go through. We will also do our normal aerification of pulling cores on all the greens.

Check our Club Facebook page to keep up with the progress we are making on the Club grounds and golf course. Please feel free to contact me with any questions or comments you may have concerning golf course maintenance.
